

# 數位財富貴賓服務

## 安全、隱私、屬於您的私房錢

1 USDC = 1 USD 匯率恆定

### 數位時代，數位美元

數字美元USDC由美國受監管的金融機構發行，以全額儲備資產為後盾，可按 1:1 兌換美元，並由美國上市公司Coinbase和Circle主導的聯盟制定國際標準。

### 源于美元，高於美元

USDC是貨幣的下一個進化形態。數位美元構建金融網路，使得貨幣和金流如同互聯網一樣互聯，可以像我們共用內容一樣進行金融交易，比現有的支付系統更安全高效。數字美元有比美元更強的流動性。

### 即時支付、清算、交易、借貸

基於區塊鏈的數字美元的力量，供您立即接入全球交易網路，並擁有更低的成本和即時結算特性；擁有安全管理全球帳戶、接入區塊鏈金融的強大生態系統及超級流動性，易於兌換和交易。

雙重風險管理

## 保護層 1: 強大可靠的智能合約

我們和最有信譽的借貸平臺和協議合作，這些平臺協議有公開透明的經過協力廠商審計的開原始程碼，保證借方和貸方之間的鏈上運作全自動、低成本、高效透明。

## 保護層 2: 完全安全的超額抵押品

所有資金在發起時都用區塊鏈資產抵押品進行了超額抵押，超額抵押率高達200%。

## 保護層 3: 超額抵押自動清算

抵押品存儲在隔離的託管中，當抵押品低於貸款價值的 120%時，向貸款方發出追加保證金通知，並負責鏈上往來，當抵押品低於當抵押品低於貸款價值的105%時，抵押品被自動清算，以保證雙方利益。

## 保護層 4: 雙重風險管理

有嚴格的監督和衡量整體貸款池，以確保借貸的信用風險政策保持在適當的風險水準內。

# USDC Savings Plan for Institutions & Corporate Treasury

**1 USDC = 1 USD forever**

## Digital Money for Digital Age

USD Coin (USDC) represents a major breakthrough in how we use money. Digital dollars move at the speed of the internet, can be exchanged in the same way we share content, and are more secure than existing payment systems.

## Built on Standard

USDC is issued by regulated financial institutions, backed by fully reserved assets, redeemable on a 1:1 basis for US dollars, and governed by Centre, a membership-based consortium that sets technical, policy and financial standards.

## Real-time Payment & Settlement

A global, fast, secure, irreversible and interoperable payments network powered by USDC seamlessly connect centralized finance represented by fiat currencies, banking system, with decentralized finance, represented by blockchain assets.

## USDC Savings Plan Briefing

1

### One to One Service

A dedicated, professional VIP manager will be assigned to the institutional case, assisting the clients throughout the lifecycle of the USDC savings plan.

2

### Trusted Custodian

Digital assets assist global asset allocation. Digital assets are managed by multi-signature hot and cold wallets, and the custodian is Circle Internet Financial Inc (Nasdaq: CND), while the fiat currency is custodied by Silvergate Bank (NYSE: SI) of the United States.

3

### Real-time Monitoring

Digital assets are real time monitored 24/7 by smart contracts, a protocol intended to automatically execute per triggering conditions. The digital assets that are loaned will always be over-collateralized by blockchain assets, and smart contracts protect the digital assets according to real- time price changes.

# USDC Savings Plan Risk Control Layers

Dual Risk Management

Third-party Custodian

Over Collateral

Portfolio

## Protection Layer 1: Strong Partners

We work with the most reputable platforms who lend to well-vetted, diversified customers and have strict credit eligibility, use of funds declarations and collateralization protocols.

## Protection Layer 2: Fully Secured Collateral

All funds are overcollateralized with a value between 120% ~ 125% with digital asset collateral at origination.

## Protection Layer 3: Third Party Custodian

The digital asset collateral is stored in a segregated account with a trusted third-party qualified digital asset custodian monitored using smart-contract. Margin calls are issued when the collateral falls below 110% of value to ensure collateral is always above value 24/7.

## Protection Layer 4: Dual Risk Management

We have strict oversight and measure the overall liquidity pool to ensure everything stays within appropriate risk levels per the credit risk policy.
